

ISHMIT KHATRI

Network Engineering & Security Student

Christchurch, New Zealand | +64 22 192 2380 | ishmitadhikari12@gmail.com | ishmit-khatri.github.io/Ishmit

PROFILE

Final-year IT student at Whitecliffe College specialising in Network Engineering & Security, with hands-on coursework in routing and switching, network security, wireless networking, and unified communications. Combines a hospitality background — reliability, teamwork, and staying calm under pressure — with a growing technical foundation in networking and systems. Looking for a February internship to apply this coursework in a real IT environment while completing the degree.

EDUCATION

Bachelor of Applied Information Technology

July 2024 – July 2027 (expected)

Whitecliffe College, Christchurch — Specialisation: Network Engineering & Security

- Coursework: IP Routing, IP Switched Networks, Troubleshooting IP Networks, Routing and Switching, Connecting Networks, Wireless Networking, Network Management, Unified Communications, Network Security, IT Security Fundamentals
- Also completed: Operating Systems, Database Administration & Management, Information Systems, Web Concepts, Software Development Fundamentals, Computer Servicing Skills, Technical Support Fundamentals

WORK EXPERIENCE

Commis Chef

April 2025 – Present

Delilah Restaurant, Christchurch

- Prepare and cook menu items to a consistent standard under time pressure during full service
- Work closely with the kitchen team to keep service running smoothly, communicating clearly during busy periods
- Follow food safety and hygiene procedures consistently across every shift

Kitchen Porter

October 2024 – April 2025

Delilah Restaurant, Christchurch

- Maintained kitchen cleanliness, equipment, and stock during high-pressure service periods
- Supported chefs with prep work, building the reliability and work ethic that led to promotion to Commis Chef

COURSEWORK PROJECTS

Multi-site WAN Network Design (Sydney–Melbourne–Brisbane)

- Designed IP addressing and subnetting for a 3-site client network, configured WAN links, and built the full topology in Packet Tracer; verified connectivity with Wireshark ICMP capture

Virtual Security Lab (VMware)

- Built a 3-machine lab (Kali Linux, Windows 11, OWASP Broken Web Apps), enabled IP forwarding, stood up an Apache server, and analysed traffic with Wireshark and ARP tables

IPv6 Tunnelling & Dual-Stack Routing

- Configured IPv6 tunnels and routing across three sites; verified OSPF/EIGRP neighbours and DHCPv6/SLAAC address assignment

Segmented Enterprise Network & Firewall Design

- Planned a VLAN structure (public, DMZ, internal server, user, management) with ASA firewall placement to protect a multi-site network

Network Threats & Mitigation Research

- Researched WannaCry, SQL Slammer and the Cisco IOS XE vulnerability; mapped vulnerability tools (Nmap, Nessus, OpenVAS, Wireshark) to mitigations

Data Safety & Privacy Risk Assessment (Group Project)

- Assessed an education provider's critical assets against key risks and mapped recommendations to New Zealand's Privacy Act 2020

Kantipur Airlines — Flight Booking Website

- Built a 3-page site in HTML/CSS with a working flight search form, tour page, and contact form

SKILLS

- Networking: routing & switching, IP addressing & subnetting, IPv6 & tunnelling, OSPF/EIGRP, VLANs, WAN design, wireless, unified communications, Packet Tracer
- Security: network security, Wireshark, Nmap, ASA firewalls, Kali Linux, risk assessment, Privacy Act 2020 awareness
- Systems: operating systems, computer servicing, technical support, database administration
- Development: HTML & CSS, Python
- Other: teamwork, reliability under pressure, clear communication, food safety compliance
